Established in 1946, Faculty of Engineering Gadjah Mada University has grown as the largest faculty in Gadjah Mada University, both in terms of the number of students and faculty staff. Having that attribute, Faculty of Engineering Gadjah Mada University, has been challenged to be directly involved in transforming and developing sciences in engineering, especially to serve for enhancing the the prosperity of our nation, and human being general. In order to perform its substantial role, all unit within the faculty has been continuously improving their quality of services, including two departments, i.e. Chemical Engineering and Civil Environmental Engineering which have obtained ISO 9001:2000, and Laboratory of Natural Oil, Gas and Coal Technology, which has acquired ISO 17025:2005 since 2008. In addition, almost all undergraduate and postgraduate study programs have renewed and improved their national accreditation conducted by BAN-PT (National Accreditation Board for Higher Education).

Becoming a competent higher education institution which produces Diploma, Bachelor, Master, and Doctoral degree graduates that are professional, having high integrity, cultural sense, international qualifications, national awareness, and having capability in giving maximum contributions to science and technology for Indonesia and global society.

In accordance with UGM’s vision an as World Class Research Universit, Faculty of Engineering has conducted a number of activities and programs to improve the international recognitions, through the development of various academic collaboration, including double-degree programs, collaborative research programs, with much-admired universities in United States, Europe, as well as Asian region. AsianUniversity Network (AUN) Seed-Net, is one of the networks, for which Department of Geological Engineering has been the Host Institution, and some other departments have been the Member Institution, is really a supportive forum for bringing Faculty of Engineering to become more internationally recognized. Through this website, I would like to welcome all incoming new students of Faculty of Engineering. This website is expected to be the most appropriate source of information on all academic programs and curricula, which might be useful for all student as well as other relevant institutions.
