## ***in conjunction with The 2nd Indonesian Youth Conference on Sustainable Development - "Community Resilience for Promoting Sustainable Development Goals in Changing Climate" 12-21 September 2017***

In this leadership course the participants will learn about SDGs, policy and agenda that currently influence sustainability worldwide and how the participants could engage with the movement, position themselves as local and global communities. The program is designed employing various methodologies which expose the participants with various issues and practices related to sustainable development including interactive lectures and discussion, case building, team work, communication skills through poster, presentation, writing, debate and interview with community, and action program within community. The course is structured over a period of 10 days including participating in youth conference at the end of the leadership course, equal to 3 credits.

The youth leadership program Community Resilience for Promoting Sustainable Development Goals in Changing Climate aim:

1. To provide transformative learning space for young individuals to contribute to sustainable development and their community.
2. To create young leaders that are passionate and motivated in making initiatives and its implementation related to climate change issues.
3. To strengthen networking and share the good practices and experiences in managing and implementing the SDGs related to climate change.

Further details about the course and application form can be downloaded from <http://rce.ugm.acid/ylpsd>

Limited to maximum 30 participants.
